

Sowelo Tiny Houses

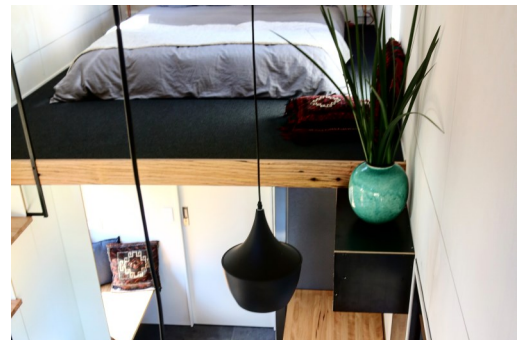

Sowelo Tiny Houses are bridging the affordability gap of the great Australian dream of owning your own home with their beautifully crafted tiny houses. With a clear focus on high quality craftsmanship, contemporary, functional designs that incorporate new, innovative products and materials, these sustainable tiny houses do not minimise on the luxuries of modern life.

The custom made tiny houses are built on an engineered trailer to avoid costly building permits and development applications. The tiny homes are built using 100% renewable solar energy and offer a spacious, affordable, stylish and fully equipped tiny house ready to go. Sowelo Tiny Houses use sustainable building products and materials that are FSC certified, low or no VOC emissions and meet industry best practices.

Quantum Timber Finishes were an ideal choice for Sowelo Tiny Houses. AQUAOIL stain was used to coat the exterior rough sawn Shadowclad to protect the timber from moisture, peeling and cracking without concealing the Shadowclad's surface texture

With over 25 years experience working in the building industry, Sowelo Tiny Houses provide customers with professionally built tiny homes. Whether it be owning your own home, adding guest accommodation, space for family and friends or to rent out as an Airbnb, these tiny houses will not disappoint.

Contact Sowelo Tiny Houses direct on 0466 261 356, or send an email to sowelo@outlook.com.au, visit www.sowelotinyhouses.com.au
